

# STOP THE SPREAD OF DISEASE IN YOUR SCHOOL

Students and staff in K-12 schools and universities are vulnerable to a myriad of diseases and conditions not only during flu season, but also year-round. If it's your job to combat the spread of disease in your facility, understanding the gravity of the situation means you'll be better prepared to manage the spread of germs and provide a clean, safe space for memorable educational experiences.

Let's take a look at the dangers lurking in your school's environment and the best ways to promote the health of your staff and student body.

## IN THE CLASSROOM

## IN THE HALLS

## IN THE BATHROOM

## Simple Preventative Measures

- 1 Educate students & staff about proper hand washing, coughing & sneezing techniques
- 2 Install hand sanitizer dispensers near high-traffic areas
- 3 Encourage students & staff to stay home when sick if circumstances allow

## The Professional Fix: Electrostatic Spray Technology

You may be able to take small steps to keep your environment cleaner than most, but ultimately, you'll need professional services to effectively combat the spread of disease. **Electrostatic spray technology** is one professional fix that uses an electrical charge to allow the appropriate sanitizers and disinfectants to wrap around and evenly coat all types of surfaces for a more complete clean.

Are you ready to find a professional cleaning partner fit for your school? Contact Commercial Cleaning Corporation to satisfy all your janitorial and building maintenance needs. Call today!
