

School Cleaning Checklist and Tips for 2022 -2023 School Year

- Make sure your janitorial staff uses a strict cross contamination policy; That means different color-coded cloth and mops should be used separate germs the bathroom and classroom
- Be sure the disinfectant you are using is rated for EVP by the epa.gov
- For disinfection cleaning surface should be fully saturated with solution for the time stated on the product label
- Consider adopting a no sharing policy for school supplies
- Limit the number of door handle touching by opting to have the teachers or staff control the door opening and closing for the classrooms
- Use Heppa filters on vacuums ideally MERV 13 or higher
- Keep several bus windows open when possible
- Consider a no touch arrival and dismissal procedure for doors by having them opened for students to just walk through
- Make sure the restroom exhaust fans are running constantly
- Hold high risk activities outdoors when possible, such as choir and gym
